Hi Ryan,

Here are revised numbers for the cable railing. Going over it again I realized had double charged in the last numbers. Im not sure how that happened.

The material fro My railing run more than some of the other ones you priced, but you should save a lot on installation time, and you have a much nicer and stronger post and top rail.

The posts, railing and cable will run \$18440.00. Installation will run \$7870.00, which will be a total of \$26,310.00

I can have them ready to go in about four to five weeks.

Let me know your thoughts and we can take it from there.

Best Regards,

Tim Quigley
